

# Assembly Instructions for Support Channels

## Parts by Carton

<p><b>A</b> Support Channel (length differs for each model) Qty: 1 or 2</p> 	<p><b>B</b> #12 x 3/4" Screws Qty: 24 or 48</p> 
--	---

Verify that you have all the hardware and tools needed for the assembly

You will also need:

#3 tip Phillips screwdriver or drill bit

or

### 1 Attach Support Channel

**a** If you have only one Support Channel, position it on the longer side of the worksurface, approximately 4 inches from the back edge.

If you have two Support Channels, similarly position the second one on the shorter (or other equal) side of the worksurface, approximately 4 inches from the back edge.

**b** Be sure all cables between legs are within Channel and are not trapped under Channel edge, then attach Channels using screws provided.
