1 Verify that you have all the hardware and tools needed for the assembly

Check your cartons against the list on page 2 to verify that you have all the parts needed.

You will also need the following tools:

#3 tip Phillips screwdriver or drill bit

If you do not have a WorkRite tabletop, you will also need a:

⅛” pilot drill bit

2 3-Leg Tables Only: Attach Crossbars to Center Leg Bracket using ¼-20 x ⅝” Button head Machine Screws and ⅜" Allen Wrench

For 2-Leg table assembly, please proceed to Step 3.

To avoid stripping the threads, always insert and make the first few turns of the screw BY HAND with an Allen wrench, ensuring it is in straight.
3  Attach Crossbars to Side Legs using ¼-20 x 5/8" Button head Machine Screws

To avoid stripping the threads, always insert and make the first few turns of the screw BY HAND with an Allen wrench, ensuring it is in straight.

4  Attach Base to Tabletop

If you have a WorkRite tabletop, align top bracket mounting holes to pre-drilled holes in tabletop and attach using #12 Phillips head Screws.

Otherwise, align base in desired position and mark placement of mounting holes, then use drill bit to drill pilot holes at marked locations. Do not drill all the way through tabletop! Attach to the base using #12 Phillips head Screws.
5 Adjust Workcenter Height

For safety and ease of adjustment, set workcenter height while table is upside down. Pull Ring Pins from each leg and raise or lower legs to desired height, then re-insert pins.

Be sure to check legs for even adjustment before turning the workcenter back to its upright position.

Cleaning instructions

To clean the Sierra legs, simply use plain water and a soft cloth.
