Important Notes

- Workcenters ship unassembled and require simple hand tools to install.
- If using customer's own worksurfaces, pre-drill pilot holes for all screws to ensure the most secure attachment.
- If installing a keyboard arm or track, the electric motor control box may need to be repositioned from its pre-drilled location.
- All workcenters have adjustable glides providing .5" of adjustment.
- Mobile pedestals may limit lower height range.
