

# Sonoma Value

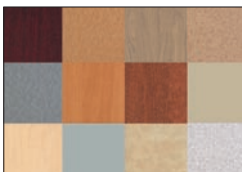

Adjustable Height Workcenters — Hand Crank, Seated Height Range

*Crank handle adjusts table height at 1" every 11 turns*

*Durable base supports up to 270 pounds of lifting capacity*

*A sampling of the 56 standard laminates available*

*Meets ANSI/BIFMA seated height range requirements*

## Crank Systems for Up-to-the-Minute Adjustment

Featuring the design styling of the Sonoma Series, Value tables are available in over 15 shapes. Their rugged yet stylish look provides a robust 270 pounds of lifting power. And our front crank provides an ergonomically friendly way to adjust the table height.

### There's a right level for everyone

In today's multishift, job-sharing offices, Workrite's manually adjustable tables offer maximum flexibility — and economy — in the seated position. Whether your employees change places every 8 hours, or every 8 months, our easy-to-operate crank tables convert quickly to the right height for each user.

No matter how much things change—including your Workrite table height—your furniture investment stays the same. Enabling you to find the right balance between economy-and ergonomic sensitivity.

### Crank systems. Up-to-the-minute adjustment

For environments like call centers or hot desking operations, the ability to change worksurface height at a moment's notice is critical. As shifts change, so do the users, and Workrite's crank adjustable tables allow each individual to reset workcenter height as needed, quickly and easily.

Even in single-occupant offices — executive or mid-level managers, for instance — crank set tables provide a simple and practical solution when cost is key. The user can still adjust his or her workcenter periodically for optimum viewing or multitasking efficiency.

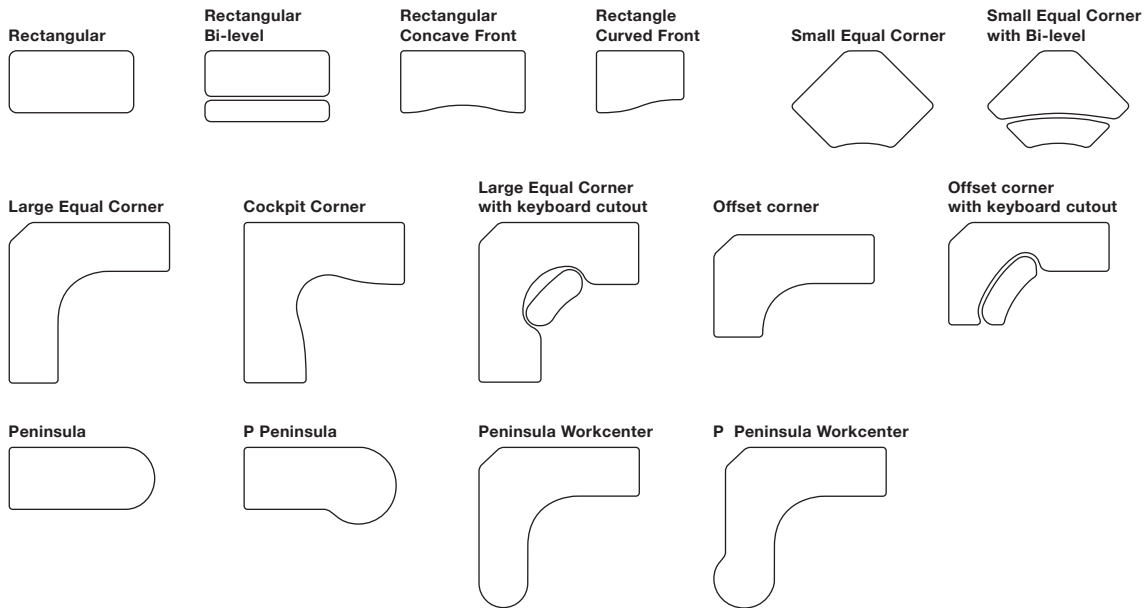

Sonoma Value meets ANSI/BIFMA seated height range requirements.

*At Workrite we believe every body has a right to work comfortably and safely for maximum productivity. You can trust Workrite, as 75% of Fortune 100 companies have, for solutions that fit today's diverse range of workers.*

## Statement of Line

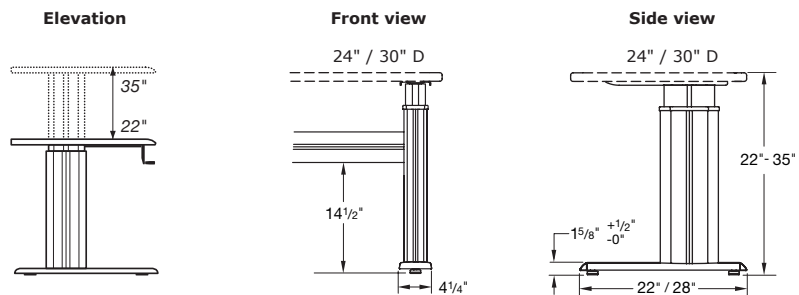

## Key Dimensions

**Height Range:**  
22" - 35"

**with keyboard cutout:**  
16" - 35"

**with bi-level surface:**  
15½" - 41"

**Speed:** 1" per 11 turns  
**Lifting Capacity:** 270 lbs.

**Color options:** See "Color and Trim Options" section of the Pricing and Specification Guide for metal finishes, edge treatments and laminate options.

**Dual surface specifications:** Front surface laminate and trim matches main worksurface.  
**Bi-level tables:** Front surface adjusted using Gemini 2420 arm with +6" to -6½" height range, and 15° to +15° tilt range.

**Keyboard cutout:** Front surface adjusted using fixed mount Pinnacle 2 arm with 0" to -6" height range, and 15° to +10° tilt range.

**Adjustable glides:** All tables have adjustable glides at front and back of each foot, providing ½" adjustment.

**Worksurfaces:** Are pre-drilled with mounting location for base and dual surface platform (if any).

**Shipping:** All tables and bases ship unassembled.

Cable management spool provided to manage excess control cables; optional cable mount accessories are available.

**Application tips:** Moving worksurfaces can collide with other components. Installation of overhead storage or wall mounted accessories in the path of the worksurface is not recommended. Workrite has tool bars which move with the worksurface and can accept a variety of desk accessories.
